

PANDEMIC GUIDELINES FROM THE NURSE

- Everyone must be wearing a face covering when entering the building.
- Health questionnaire should be completed before entering school.
- Go past "thermoscan" machine before going into the rest of the building.
- If temperature is above 100.4, they are to go to the nurse's office for a recheck of temperature.
- Nurse will check temperature. If still elevated. Student will go to isolation room and nurse will call parent/guardian to come and promptly take child home.
- If student/staff have a fever but show no symptoms of COVID-19, they must stay home for 3 days AND at least 24 hours after fever is resolved.
- **** For staff and students, who are not currently a close contact or quarantined, but have symptoms that may be associated with COVID-19 may return to school when any of the following applies.**
 - **Symptomatic individual/child not tested:** exclude for 14 days from symptom onset AND at least 24 hours after fever resolution (if present) AND improved respiratory symptoms or
 - **Symptomatic individual/child clinically cleared by healthcare provider;** exclude until afebrile for 24 hours (if fever present) and symptoms improving: or
 - **Symptomatic individual/child with test negative:** exclude until afebrile for 24 hours (if fever present) AND improved respiratory symptoms.
- If student/staff present with symptoms that are consistent with COVID-19, we will
 - Put them in the isolation area
 - Send them home with a referral to healthcare provider
 - Must return with a clearance from their healthcare provider
 - If they have a positive COVID-19 test or were in close contact with a person with COVID-19, they need to be quarantine for 14 days.
 - May return to school after quarantine and fever/symptom free (without medication) for 24 hours
- After sending a student home from the isolation room, the nurse will disinfect the room, including cot, pillow, door handles, light switches etc.

GENERAL NURSES OFFICE GUIDELINES

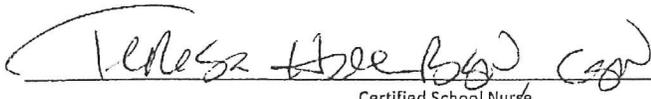

- Those receiving medications or diabetics should enter the nurse's office from a different entrance than the sick students or receive their medication in the hallway so that they have limited contact with sick students.
- Teachers should avoid sending non-sick students to the nurse; for example: complaints of hangnails, loose tooth, small cuts etc. to avoid well children coming in contact with sick ones.
- Special needs students should use a different restroom than the nurse's office to avoid being around sick children.
- The nurse will remove blankets and cloth pillows and other items that are difficult to disinfect.
- The nurse will disinfect blood pressure cuffs, stethoscopes, thermometers, etc. between students.
- The nurse will disinfect cots, pillows after each student use and will disinfect high touch areas periodically during the day.
