Respiratory Illness/COVID-19 Guidelines

On March 1st, 2024, the CDC updated their respiratory illnesses guidelines to include COVID-19. It is now the recommendation that when someone is diagnosed with COVID-19, you no longer have to quarantine for a standard period of time. Instead, it is recommended that you stay home until symptoms are improving and you are fever free for 24 hours without the use of fever reducing medication.

If your child has tested positive for COVID-19 or another respiratory illness such as the flu and RSV, keep your child home until their symptoms are improving and they are fever free for 24 hours without the use of fever reducing medication. If you have any questions regarding the health status of your child, please contact your child's school nurse.

Thank you,

MASD Health Services
